

# **TRAINING OPPORTUNITIES provided by ICC Region VI**

Below are 3 training opportunities that the Region VI Board is offering to aid our membership with very important topics you will encounter. 2 Code related webinars and 1 free class on how to participate the Code Development process.

**The 2 primary classes:** Nov 14,2025 1-4 PM Onsite Energy Storage Systems and issues associated with the buildings they are installed in. This is being offered by Chief Micheal Obrian who is the leader in the ICC effort to develop standards to address the code issues. This class will give you the details you need to consider when encountering ESS.

**Nov 18,2025 1-4 PM** The next in our series on Disaster planning for your community. This is intended to help us understand the need and benefits of Mutual Aid and disaster preparedness. A key to your own efforts if your office is directly impacted, this will provide some critical guidance to you before an event hits. Again presented by William Bracken who has developed the ICC Institute program for "When Disaster Strikes". As this continues our series from last year.

Both of the above class registrations links are below and available until NOVEMBER 12 for \$30 each. Registration and payment must be made prior to November 12, 2025. Registration thru WebEx followed by payment thru SQUARE. **IMPORTANT** item for those paying for multiple individuals, you can pay for all at once, but you **must** send a list of the members you paid for to Region VI, with their email addresss ([mmoseley@townithacany.gov](mailto:mmoseley@townithacany.gov)). If a list of paid members is not provided, the registrations will not be approved and the link to join the webinar will not be provided. All individuals are required to register though WebEx, and pay the fee to receive the webinar link.

The last class is a 45 minute **FREE** presentation on the cdpACCESS which is how we all vote and participate in **CODE DEVELOPMENT**. Dottie Harris will be your guide to the finer points of using your membership benefits to effect changes to the codes we all work with. This is a great course for new and veteran code officials. Same Webex registration link available and no need for use of SQUARE as this is a **FREE EVENT** for our members.

All of these classes are offered as preferred provider or ICC authorized classes for CEU credit.

We know the events are close and PLEASE feel free to share this with others in our profession.

The programs are as follows:

**November 14, 2025 1:00PM-4:00PM**

### **Energy Storage and the Code**

**Goal and Objectives:** On-site Energy storage systems and the Codes. This will be a very informative class on the issues we all face regarding electric vehicles and the use of onsite battery issues.

Chief Micheal Obrian - the premier expert that ICC requested assistance with to develop a plan to develop standards to address the many issues with energy storage. Mike is the leading authority on ESS. This class is a must as you move forward with these developing products coming to a home or business near you.

- Registration link for On-site Energy storage systems and the Codes: [Registration Link for Onsite Energy Storage Webinar](#).
- Attendees will need to register for the webinar first. Once they have registered for the webinar, they will receive an email with a link to provide payment to ICC Region VI. Once they pay for the webinar, ICC Region VI will approve their registration. Once the registration is approved, the registrant will receive a follow up email with the link to be able to join the webinar.
- Cost is \$30 per attendee

**November 18, 2025 1:00 PM- 4:00 PM**

### **Mutual Aid and When Disaster Strikes**

**Goal & Objectives:** William Bracken will continue the critical series from the ICC Institute on "When Disaster Strikes" with "Mutual Aid and Disaster Recovery Reform Act (DRRA)1206". This is critical to any Code Official who may suffer from a natural disaster that occurs in their own community. If your own family is at risk you will wish you had mutual aid agreements in place to assist your community when time is critical to help being available. This class will explain the need and benefits to early planning when you have the time and ability. This is an extension of the classes provided last year in the Region VI series. Don't miss this next class in the series, presented by the developer of the full course.
